Alaska Air Medical Escort Training Manual

Fourth Edition

Frank H. Murkowski, Governor
State of Alaska

Karleen K. Jackson, Commissioner
Department of Health and Social Services

Richard Mandsager M.D., Director
Division of Public Health

Timothy K. Bundy, Chief
Section of Injury Prevention and EMS

The *Alaska Air Medical Escort Training Manual* was developed as a text for all levels of air medical escorts. It accompanies the Alaska Medevac Escort Course taught by a state recognized Alaska air medical instructor.

It is assumed that escorts have basic medical knowledge to the level of their training. The information included in this text is intended to be specific to the air medical environment, and is more comprehensive than the class.

The companion text, the *Alaska Medevac Manual*, is a reference that can be taken on flights. It has information specific to each medical diagnosis, and general reference material that can be useful during transport. These manuals are available from the Emergency Medical Services (EMS) Office, Juneau, Alaska, (907) 465-3027.

Contents

Forward

- i Forward
- ii Putting Regulations Into Perspective
